

Participant Flow and Analysis Design

**Source dataset: Fehring (2012), Marquette University archive
Collected in the NFP trial of Fehring et al. (2013), USA**

Assessed for eligibility
(regularly cycling women of reproductive age)

- Excluded:
- Menopausal / perimenopausal
 - Postpartum
 - Hormonal use

NFP users included in source
(self-selected, cycle-aware women)

Applied inclusion criteria:
Cycle length ≥ 18 and ≤ 54 days;
Complete cycle-length records

- Excluded:
- Missing cycle-length data
 - Implausible cycle lengths

**Analysed: N = 118 women
1,554 cycles (mean 13.2, SD 6.1, range 5-45)**

Pattern detection applied
(5 cycle-length-based vessel types)

H_G
Global permutation
(B = 50,000)

H_{iid}
Multinomial null
(B = 50,000)

H_W
Within-woman perm.
(B = 50,000)
